Dear Dr. Henney:

Based on my own past experience in the early 1950's, I am definitely in favor of the FDA promptly approving claims for saw palmetto and the symptoms of benign prostatic hyperplasia, psyllium husk seeds and the risk of heart disease --- as well as claims filed for folic acid, vitamin B6 and vitamin B12 and cardiovascular disease plus Vitamin E and the risk of cardiovascular disease.

Please do your utmost to help countless additional men and women (and children) from becoming helpless victims of these deadly diseases.

Sincerely,

Lloyd Rhodes
